50 years of lattice QCD

Thursday, 1 August 2024 15:45 (45 minutes)

John Kogut: How was Lattice Gauge Theory born? What was it like in the “early days” of ~1975? How did High Energy Physics and Condensed Matter Theory get together? What were the BIG physics problems and technical challenges of the day? This short talk looks at these topics from one person’s recollections and perspective.

Jan Smit: Recalling early years of Lattice Gauge Theory

Presenters: SMIT, Jan (University of Amsterdam); KOGUT, John (USDOE and University of Maryland)

Session Classification: Plenary
