Online or in-person?

Tuesday, 30 July 2024 18:15 (1 hour)

Following from LDIC survey performed last year in May and June 2023, we show more information about the preferences regarding online or in person workshops and connect them to diversity concerns. People with disabilities, women and non-binary respondents, and ethnic and religious minorities express the opinion that online workshops are more inclusive. However, we find a slight effect that the opposite is true for respondents with care responsibilities for children or vulnerable relatives, suggesting that feelings of welcomeness play a significant role in the perception of inclusivity of a workshop and practical concerns do not outweigh the inclusivity of being able to participate in person.

Primary authors: PORTELLI, Antonin (The University of Edinburgh); CHAKRABORTY, Bipasha (University of Southampton); Prof. ROMERO-LÓPEZ, Fernando (University of Bern); STOKES, Finn (The University of Adelaide); RAYCHOWDHURY, Indrakshi (Department of Physics, BITS Pilani, KK Birla Goa Campus); CONSTANTINO, Martha (Temple University); MATHUR, Nilmani (Tata Institute of Fundamental Research); MARTINS, Sofie (University of Southern Denmark); MENDES, Tereza (University of São Paulo)

Presenter: CHAKRABORTY, Bipasha (University of Southampton)

Session Classification: Poster session and reception

Track Classification: Applications Outside Particle Physics
