

# ttH( $\rightarrow$ bb) meeting: Introduction

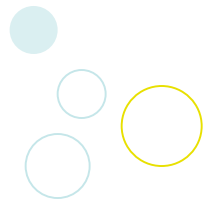

May 05 2008

Lorenzo Feligioni (CPPM)  
Chris Collins Tooth (Glasgow)

# Outline of the meeting

- Three points to discuss:
  1. All CSC groups have been asked to perform a “quick” study on the comparison with the CMS results to be presented at the next HWG meeting
    - See Georges’ talk
  2. Status of the CSC note
    - Bill’s presentation
  3. Preparation for the Performance and Physics Workshop
    - Next slide

# Performance and Physics Workshop

- Each of the CSC note is expected to produce some transparencies on the following subjects using the 'first data':
  - For three different scenarios for the integrated luminosity:  
 $10 \text{ pb}^{-1}$ ,  $100 \text{ pb}^{-1}$ ,  $1 \text{ fb}^{-1}$ 
    1. collaboration with the combined performance groups
    2. reference / calibration signals with first data
    3. physics issues with first data
    4. common SM backgrounds (e.g. QCD, W/Z+jets, top,..)
    5. reconstruction methods, e.g. top
