2011 IPMU-YITP School and Workshop on Monte Carlo Tools for LHC

September 5, 2011 - September 10, 2011

Yukawa Institute for Theoretical Physics (YITP)

Scientific Program

The School will provide a four day course of training in the physics and techniques used in modern Monte Carlo event generators via a series of lectures and practical sessions. The school is aimed at advanced doctoral students and young postdocs. It will be followed by a two day mini-workshop on the latest developments in event generators and their applications at LHC.
