

LAr-TPC Event Reconstruction

Ben Morgan

THE UNIVERSITY OF
WARWICK

The Electronic Bubble Chamber

Alberto Guglielmi (ICARUS), Neutrino 2010:

<http://indico.cern.ch/conferenceDisplay.py?confId=73981>

Can LAr-TPCs realise their potential?

- Quantifying the physics performance requires software to reconstruct:
 - Particle energies.
 - Particle momenta.
 - Particle Type ID.
 - Interaction Vertices.
 - Anything else?

**Automatic reconstruction software
does not exist for liquid argon...**

Why?

Beauty has a price...

Tracks AND Showers

Multiple Scattering

Where's the IP?

ICARUS,
arXiv:0812.2373

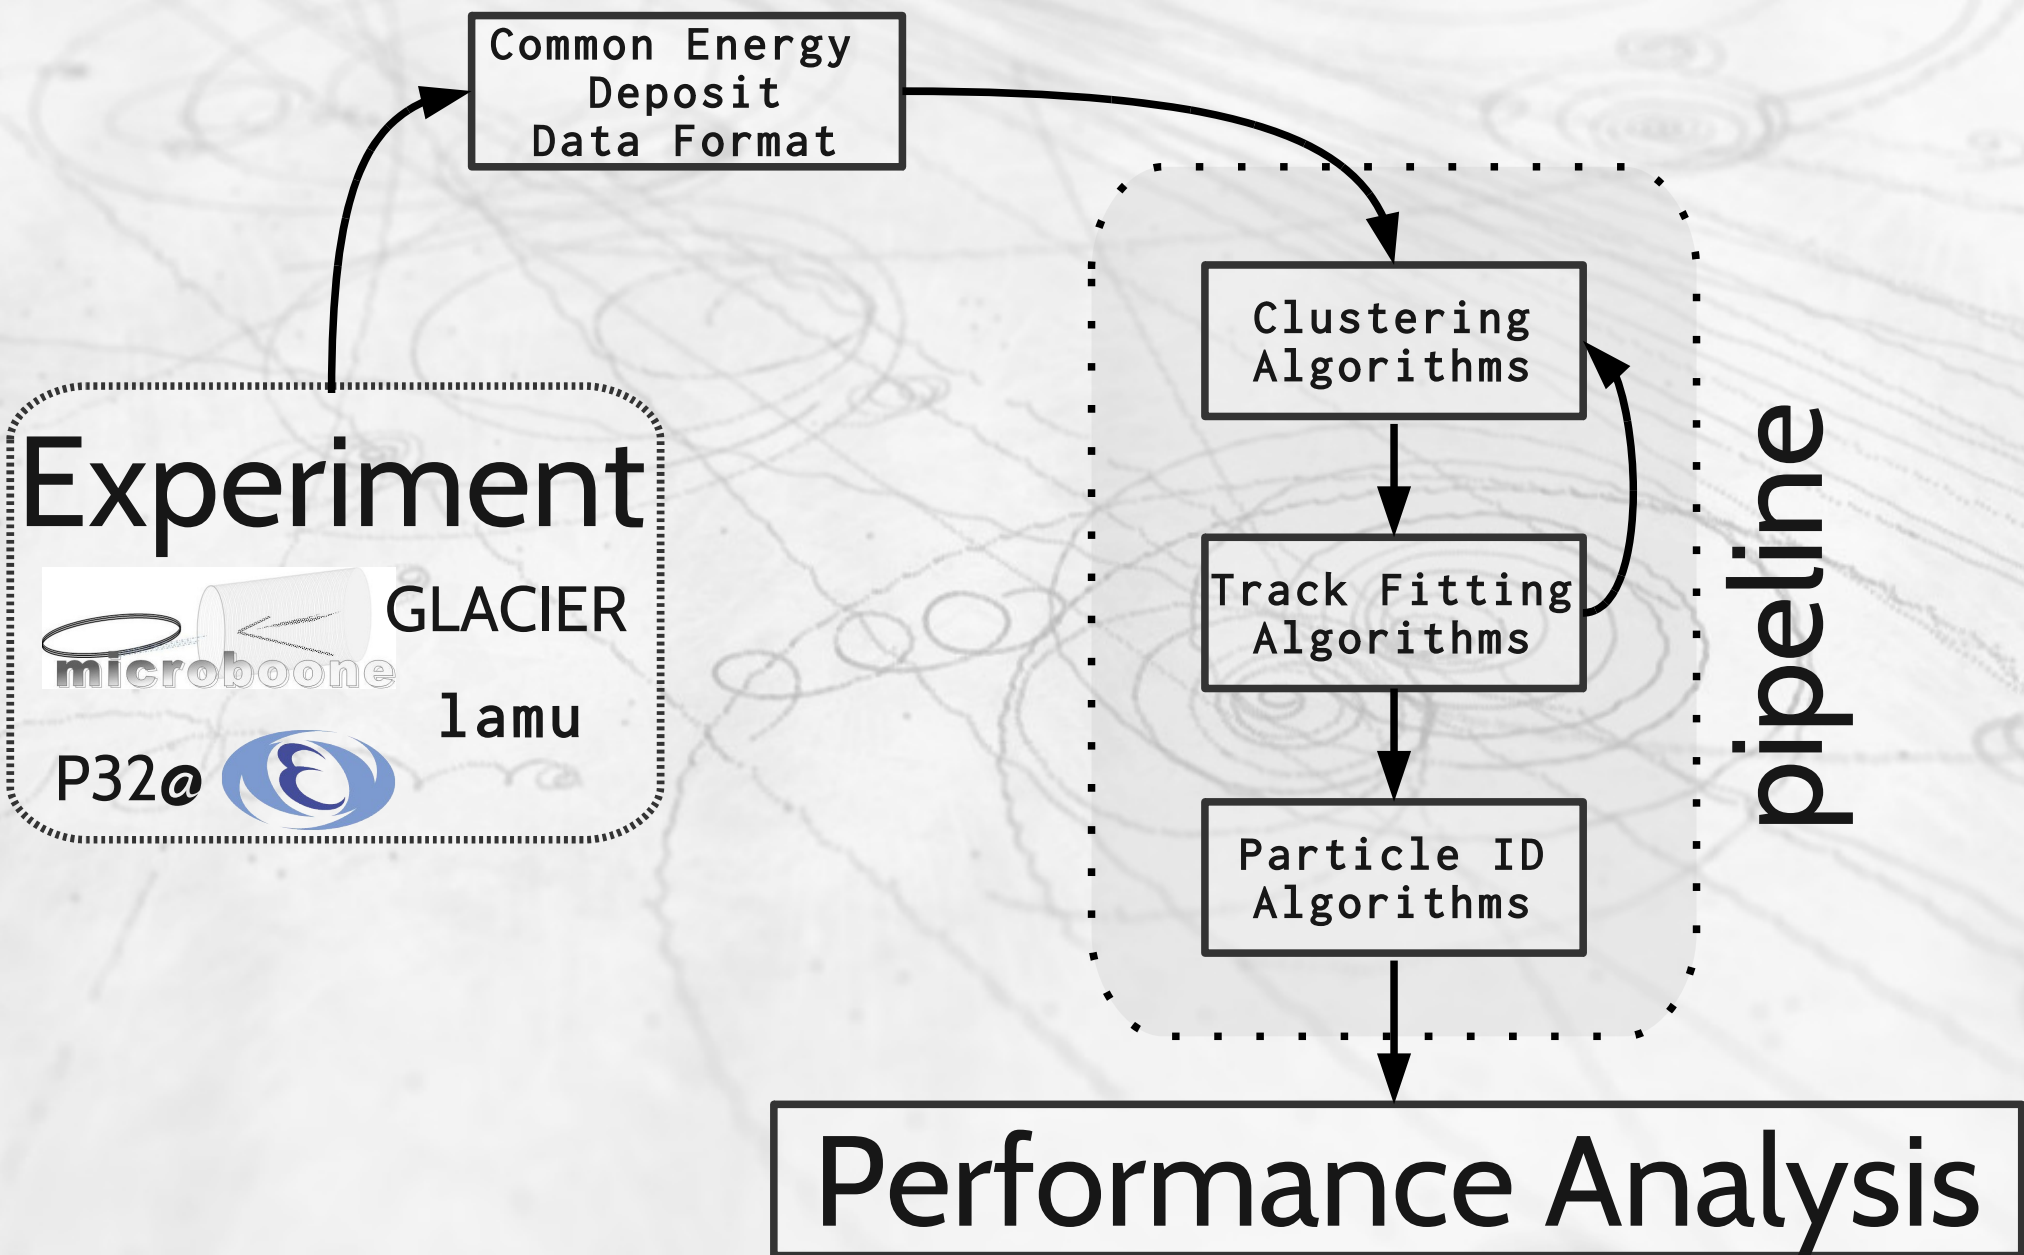

2011 – the year of automation?

LArSoft
 **Fermilab**

QScan
ETH
Eidgenössische Technische Hochschule Zürich
Swiss Federal Institute of Technology Zurich

vertex finding
topological association
automation
particle ID
track fitting
clustering
e-pion separation
analysis

Clustering Strategy

- Conservative algorithms.

- Topological merging.

DBSCAN* Algorithm

- Density based.
- Neighbourhood ϵ of a point must have $\geq N_{\min}$ points.
- Clusters formed by **density reachable** points.

ϵ -Neighbourhood
 $N \geq 5$

*Sander et al, Data Mining and Knowledge Discovery 2, pp169-194 (1998)

DBSCAN in ArgoNEUT

Kinga Partyka (Yale/ArgoNEUT)

DBSCAN can be too liberal...

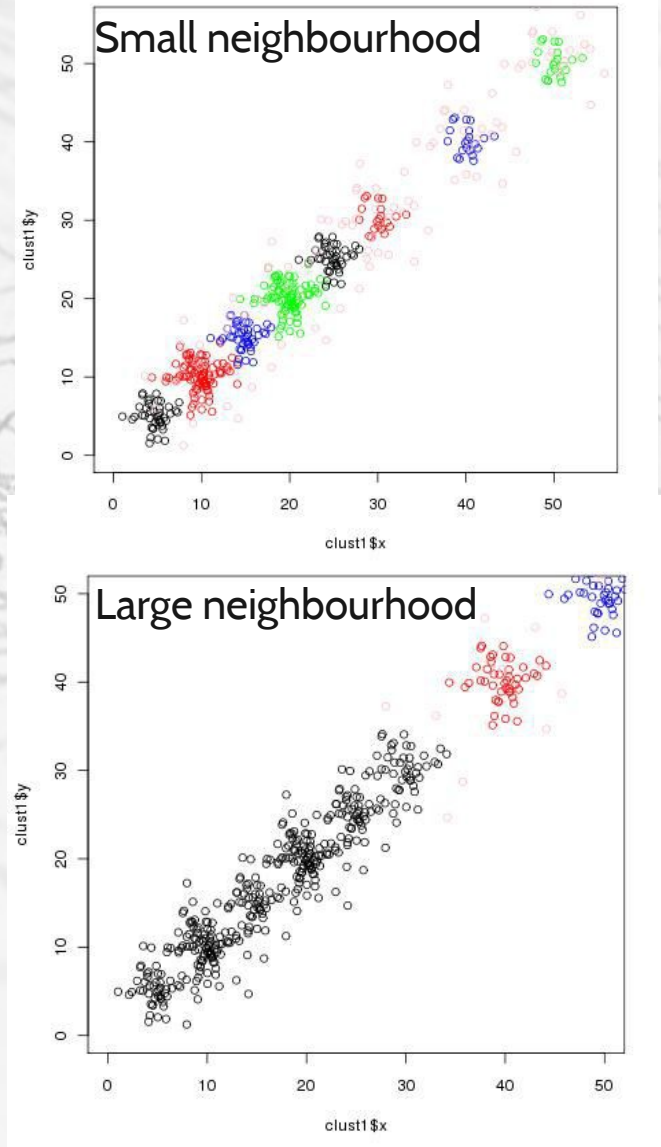

Kinga Partyka (Yale/ArgoNEUT)

OPTICS* Algorithm

Dan Roythorne, Ben Morgan
University of Warwick.

- Extension of DBSCAN.
- Measures clustering on all scales of neighbourhood ϵ .
- Tuning of ϵ -scale can be used to minimize overclustering.

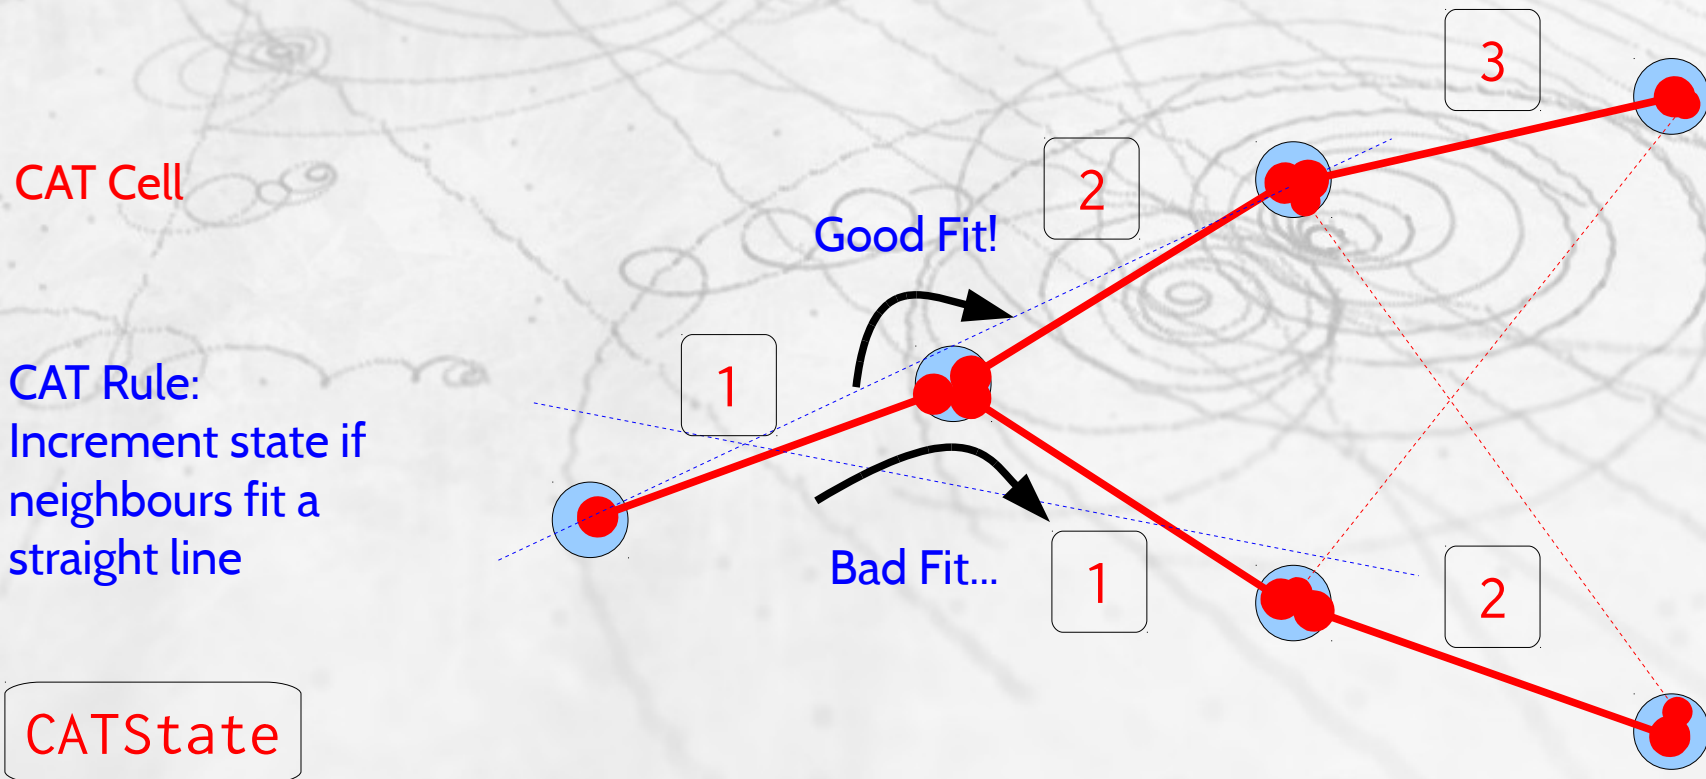

*Ankerst et al, ACM SIGMOD Int Conf. on
Management Of Data pp49-60 (1999)

Cellular Automata

Andrew Bennieston
University of Warwick.

- Dynamical system with rules for update of local state at discrete steps.

Particle Flow

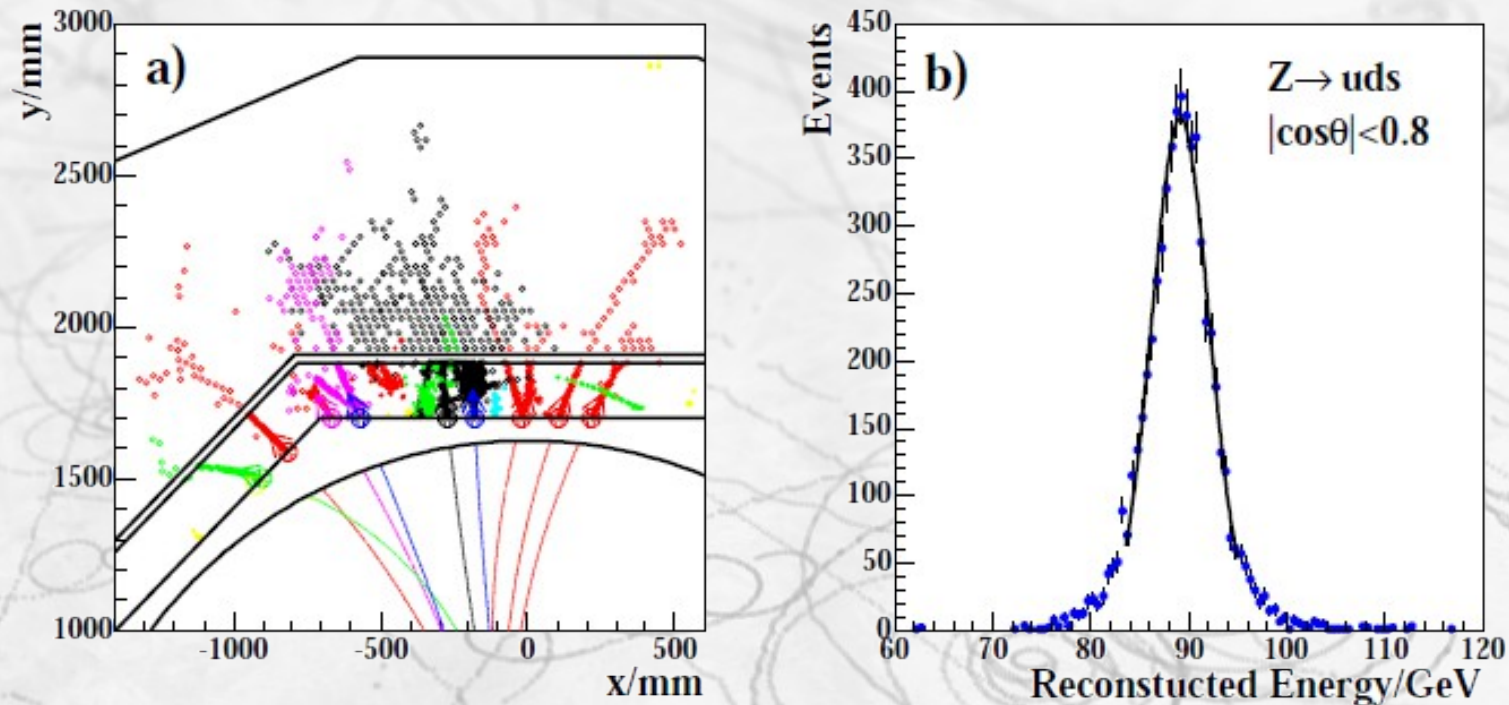

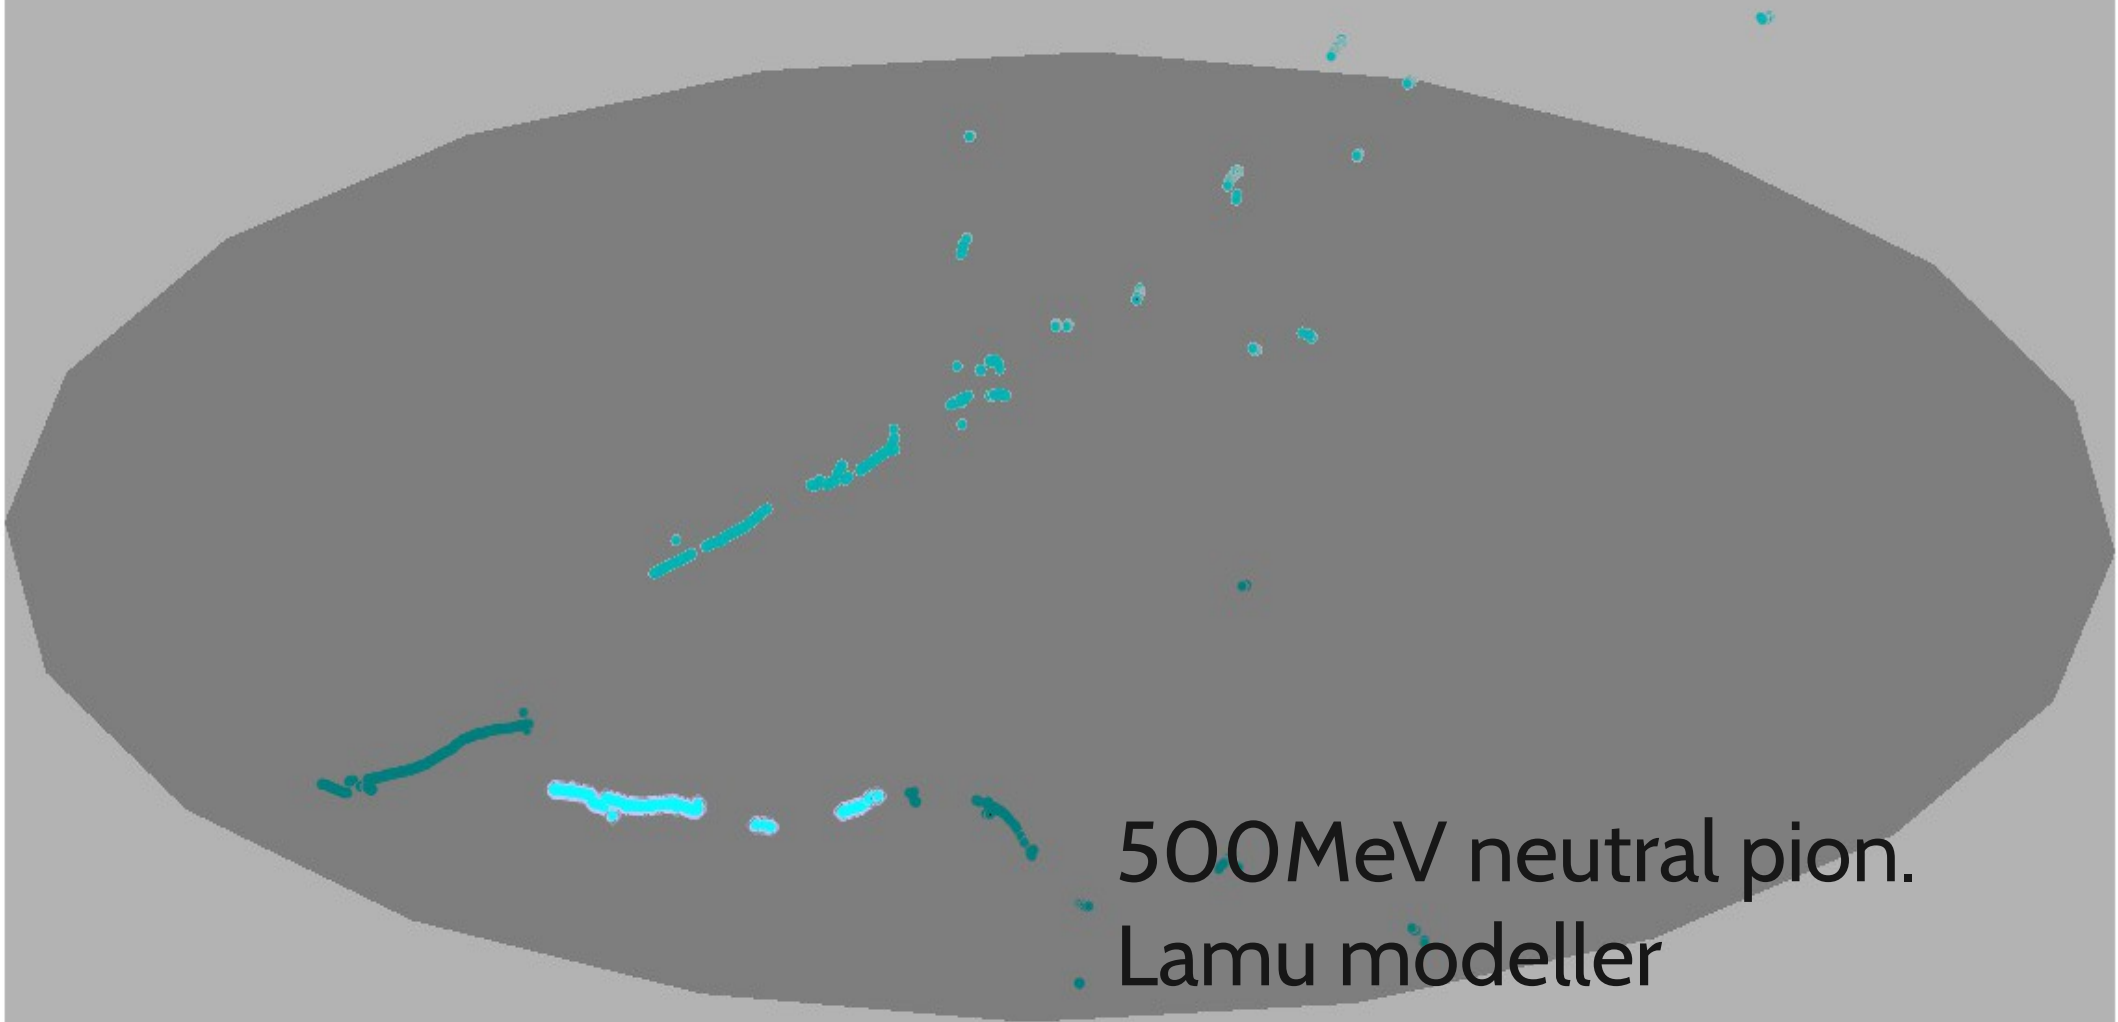

Figure 1: (a) An example of the particle flow reconstruction of a 100 GeV jet using the PandoraPFA algorithm; (b) the distribution of the total reconstructed jet energy in the decays of Z to light quarks (uds) at $\sqrt{s} = 91.2$ GeV.

- ILC needs tracking calorimetry for jet resolution.
 - => Particle flow algorithms.
- PandoraPFA modular framework
 - Mark Thomson, John Marshall (Cambridge)

Latte + PandoraPFA

- Warwick/Cambridge working on PFA for LAr.

500 MeV neutral pion.

Lamu modeller

PandoraPFA reconstruction

Key Point Detection

Ben Morgan
University of Warwick.

- Structure Tensor of energy deposits can identify points of interest.

CCQE Vertex Detection

- Latte: Foestner/Noble Corner Detection Measure.
- Primary vertex identified with $>85\%$ efficiency.
 - Ben Morgan, JINST 5(07), pp.7006 (2010)

The Road to Performance.

- Focus Reconstruction efforts → Phenomenology.
- World collaboration and **teamwork** critical.
- **Warwick's experiment-independent software toolbox can help to unify efforts.**
