

Future plans – Insubria group

General considerations

- *We have used 14 days out of 90 → time schedule has modified a lot since the first plan*
- *People listed in the TA have ended their contract and gone (or are going) somewhere else*
- *We are not effectively part of the MICE collaboration but only of the EMR project*

Question

- *Is it possible to add new people in the original TA list?*

IF YES

*We are going to send one/two persons at RAL during the installation and commissioning of EMR (if UNIGE agrees) to help and make experience
→ the expected nr of days is between 20 and 40*
