

# Higgs Couplings 2015

## Wednesday, October 14, 2015

### Hot topics (2:30 PM - 5:00 PM)

time	[id] title	presenter
2:30 PM	[43] Charged Higgs bosons: Theory	ZARO, Marco
2:50 PM	[40] Interpretations of multilepton excesses in ttH searches	ISMAIL, Ahmed
3:10 PM	[32] Model building implications: What have we learned so far?	SHAH, Nausheen
3:30 PM	[45] Short presentation by ATLAS: Search for the bb decay of the SM Higgs boson in associated (W/Z)H production with the ATLAS detector	BUESCHER, Daniel
3:45 PM	[47] Short presentation by ATLAS: H -> tau tau, beyond evidence	LIEBAL, Jessica Kristina
4:00 PM	[46] Short presentation by ATLAS: ttH, H->bb	CONNELLY, Ian
4:15 PM	[48] Short presentation by CMS: Search for Lepton Flavour Violating Higgs Decays	VANHOEFER, Annika
4:30 PM	[49] Short presentation from CMS: Search for a Higgs-like boson decaying to WW or ZZ in the mass range between 145 GeV and 1 TeV	BRIANZA, Luca
4:45 PM	[50] Short presentation from CMS: Higgs boson properties using H->4l: lifetime and quantum numbers	YOU, Can
