## Mass anomalous dimension of SU(2) using the spectral density method

*Tuesday, July 26, 2016 7:00 PM (1 hour)*

We study the mass anomalous dimension of SU(2) with  $N_f = 6$  and  $N_f = 8$  in both massless and massive quark cases for a range of gauge coupling values. In the massless case we find behaviour consistent with results obtained using the Schrödinger functional method.
