Disconnected diagrams with twisted-mass fermions

Thursday, July 28, 2016 5:30 PM (20 minutes)

The latest results from the Twisted-Mass collaboration on disconnected diagrams at the physical value of the pion mass are presented. In particular, we focus on the sigma terms, the axial charges and the momentum fraction. A detailed error analysis for each observable follows, showing the strengths and weaknesses of the one-end trick. Alternatives are discussed.

Author: Dr VAQUERO, Alejandro (INFN Sezione Milano Bicocca)

Co-authors: Dr ABDEL-REHIM, Abdou (The Cyprus Institute); Dr KALLIDONIS, Christos (The Cyprus Institute); Prof. ALEXANDROU, Constantia (University of Cyprus and The Cyprus Institute); Dr KOUTSOU, Giannis (The Cyprus Institute); Prof. JANSEN, Karl (DESY Zeuthen); Dr HADJIYIANNAKOU, Kyriakos (University of Cyprus); Dr CONSTANTINO, Martha (University of Cyprus)

Presenter: Dr VAQUERO, Alejandro (INFN Sezione Milano Bicocca)

Session Classification: Hadron Structure

Track Classification: Hadron Structure
