Thermodynamics of two-color matter at non-zero baryon density

Monday 1 August 2016 17:25 (2h 5m)

We study two-color QCD with two flavours of Wilson fermion as a function of quark chemical potential and temperature. Recent results are presented and the phase diagram is discussed.

Author: Dr GIUDICE, pietro (University of Muenster)

Co-authors: Dr SKULLERUD, Jon-Ivar (Maynooth University); Prof. HANDS, Simon (Swansea University)

Presenter: Dr GIUDICE, pietro (University of Muenster)

Session Classification: Poster session

Track Classification: Quantum Field Theories of dense, cold matter
