

XQCD 2016

Wednesday 03 August 2016

Wednesday AM: 1 - Portland Square (09:00-10:35)

-Conveners: Francesco Di Renzo

| time | [id] title | presenter |
|-------|---|-----------------------|
| 09:00 | [14] Bulk properties of strongly interacting matter: recent results from lattice QCD | Dr RATTI, Claudia |
| 09:45 | [52] The QCD equation of state and fluctuations of conserved charges at non-vanishing temperature and density | Dr SCHMIDT, Christian |
| 10:10 | [36] Theta dependence in the deconfined phase of QCD | Dr BONATI, Claudio |

Wednesday AM: 2 - Portland Square (11:05-12:40)

-Conveners: Gert Aarts

| time | [id] title | presenter |
|-------|---|------------------------|
| 11:05 | [20] Finite temperature lattice QCD review | NOGRADI, Daniel |
| 11:50 | [24] The phase diagram of QCD with isospin chemical potential | Dr BRANDT, Bastian |
| 12:15 | [41] Topological susceptibility in finite-temperature (2+1)-flavor QCD with gradient flow | Prof. KANAYA, Kazuyuki |
