## The B anomalies

*Wednesday, 30 June 2021 17:10 (35 minutes)*

An overview of the anomalies observed in measurements of neutral- and charged-current b quark transitions will be presented. Experimental and theoretical challenges for the relevant measurements will be discussed, and an outlook for future developments that may give clarity presented.

**Presenter:** PATEL (LHCB), Mitesh (Imperial College London)

**Session Classification:** Muon Anomalies
